“düştten gerçeğe”

Oyun, çocukların sosyal uyum, zeka ve becerilerini geliştiren, belirli bir yer ve zaman içerisinde, kendine özgü kurallarla yapılan, çocukların dinlenmelerini ve öğrenmelerini sağlayan eğlenceli bir etkinliktir.

Oyun, çocuğun isteklerini, amaçlarını anlatan, toplumsal hayata hazırlayan en etkili araçlardandır.

Çocuğun devamlı oynama isteği, onun geleceğe yönelik hareketlerinin ifadesidir. Özellikle mücadele oyunları içinde çocuklar sürekli olarak koşmak, zıplamak, tırmanmak, çekmek, itmek, boğuşmak gibi vücut özellikleriyle mücadele etmek durumundadırlar.

Çocuk, sahip olduğu fiziksel yetenekleriyle diğer oyunculara karşı bir yarış halindedir. Bu mücadele nedeniyle yapmış olduğu hareketlilik sayesinde, öncelikle solunum, dolaşım ve sindirim sistemi olumlu etkilenir. Ayrıca iç salgı bezlerinden daha fazla salgılama yapılmasına katkıda bulunarak çocuğun gelişmesini hızlandırır.

The game is a fun activity with its own rules that develops children's social cohesion, intelligence and skills, and allows them to relax and learn in a certain place and time.

The game is one of the most effective means that describe the child's wishes and aims, and prepare them for social life.

The constant desire of a child to play is an expression of his future interests and development. Especially during competitive games, children exercise body motions like running, jumping, climbing, pulling, pushing and wrestling non-stop.

The child is in a race against other players with his physical abilities. Because of this activity, breathing, circulation and digestive system are positively affected. It also accelerates the development of the child by increasing the secretion of the glands..

* EN 1177 standardına uygundur.

*Tiles are in conformity with EN 1177 standards.

Yeni nesil ve interaktif oyun gruplarının, klasik oyun gruplarına göre düşme yükseklik riskleri fazladır. Dolayısı ile yeni nesil oyun gruplarındaki kritik düşme yüksekliğine uygun, standartların öngördüğü maximum darbe emici özelliğe sahip zemin kaplaması yapılmalıdır. Türkiye’de ilk ve tek üretilen bu kauçuk modeli ile 3 m ve üzeri kritik düşme yüksekliği karşılanabilmektedir.

New generation and interactive game groups have a higher risk of fall height than traditional game groups. Therefore, a floor cover which is appropriate for the critical fall height of new generation game groups and meets the maximum shock-absorbing criteria set forth by the standards, is essential. With this new rubber design, standards for 3 meters and higher fall height can be met.
