X - ERGONOM FITNESS / MULTIPLE TRAINING

With Multi-sports training products, our aim is to help users to improve in their muscle building journey. The products which are comprised of many workout options are a great opportunity for those who want to exercise outdoors and socialise with others.

X- ERGONOM FITNESS

ACT 114-ASTM

Metal parts are comprised of ST 37 Steel with a 3-step metal finish. Sandblasting and solvent-free zinc primer coating and electrostatic powder paint application is inherently corrosion resistant under extreme weather conditions and UV.

Exercise panels are made of 12mm HPL panels with high UV resistant and fire retardant. To increase exercise comfort, HPL minimize the generation of electrostatic charge by contact-separation or rubbing with another material.

CmrRope™ is formed by 6 strands of galvanized wires and a core either steel or fiber. Each strand is tightly braided with Polyester which is adhered to galvanized wires with a patented method to create a solid surface where polyester meets with wires. So extra protection is achieved against friction and vandalism. Surface is extremely abrasion and UV resistant also fire retardant.

The product is comprised of 3 polyethylene parts for weights in order to ensure muscle building. With the stop mechanism that we exclusively developed for the product, accidents and injuries are prevented due to pace and weight control.
